

YOUR PARTNERS IN ELECTRICITY PURCHASING

ADDRESSING THE ELECTRICITY NEEDS OF OUR CLIENTS WITH OVER \$1 BILLION OF EXPERIENCE

Beacom Energy creates an opportunity for clients to reduce energy expenditures while understanding their risk tolerance, based on current and future changes within their facilities, will determine the best program. We want to be your best decision in Electricity Purchasing. Our extensive approach includes the following services:

Tariff Analysis - Our Energy Advisors recommend the tariff rate that best fits your company's energy usage pattern, operational needs and business objectives. In addition, we look for ways to control your costs by closely monitoring utility rate changes and any related impacts for your organization.

Supplier Negotiations - Some energy usage patterns provide companies with leverage to negotiate with utilities for better contract conditions or rate structures. Beacom Energy has the expertise to not only identify these opportunities for your organization, but also negotiate with the utility on your behalf from an informed position.

Tax Exemptions - Our energy Advisors proactively identify energy-related tax exemptions that can bring significant savings for your company.

Utilities Management - Beacom Energy has analysts devoted to specific markets, utilities and regulatory bodies. Our regional Energy Advisors are acutely attuned to opportunities associated with specific utilities and geographic areas.

Budget Development - By applying our market intelligence to your company's historical energy consumption pattern, our energy professionals can forecast utility rates and energy costs for each of your facilities. Our customized and informed forecasts can lead your company to more accurate energy budgets.

We have the people, processes and technology needed to save money and improve processes for your company. Contact us to learn more.
