

YOUR PARTNERS IN DISTRIBUTION

FULFILLING THE SUPPLY NEEDS OF OUR CLIENTS

Beacom Energy is a leading distributor and project management provider in the Midwest with the best products available, superior technology and years of experience to deliver what you need quickly, reliably, easily, and cost-effectively.

Our customized services will ensure your project is completed ontime and within budget, while providing long-term savings and optimal customer service for our Partners. No matter the size of the project, Beacom provides hardware and technological support easily tracking the products they need delivered. We cure the headaches of project management and the logistics of timely deliveries with our single point of contact and our inventory management system, making each project run smoothly.

We can provide hardware and technological support for all your needs including high/low bay, surface mount, recessed, or wall mount needs. Also, our lighting and security products are good for any exterior, interior, residential, commercial or industrial application.

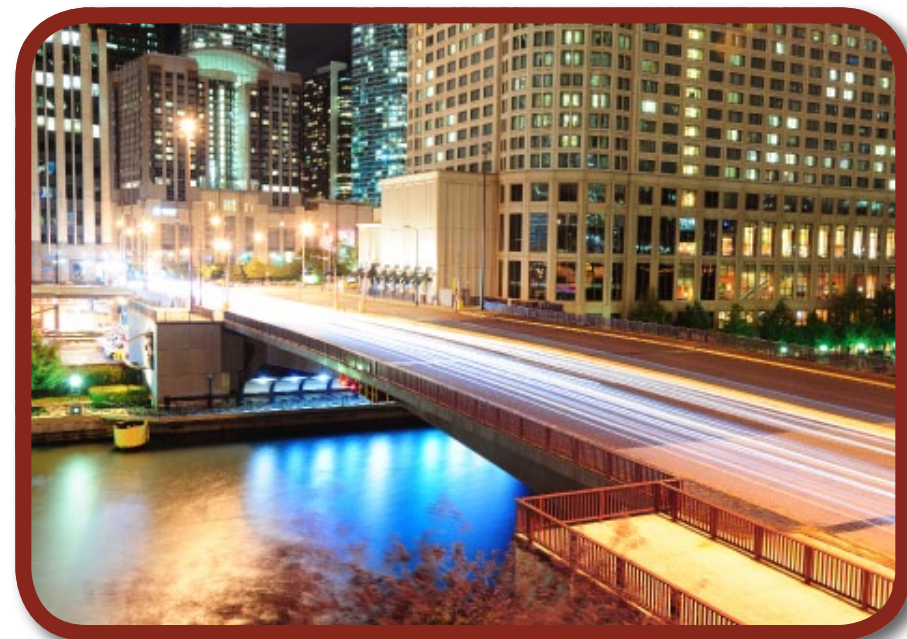

We have the people, processes and technology needed to save money and improve the efficiency of your hardworking facilities.

It's Simple. Beacom will:

- **Lighting & Security Camera Distribution** ~ Provide comprehensive distribution services for efficiency and security projects, focusing on cameras, lighting and associated materials
- **Project Management** ~ Bring projects to completion on time and within budget
